# DANSE

Inspired by **STONE ITALIANA**

Danse is a series of side tables that takes inspiration from the precise balance of a ballet dancer and the thin line of a centered equilibrium in movement that maintains the stability and solidity of marble. The material base strongly contrasts with, yet supports the metal structure with elegance, making the two elements resonate as if a musical counterpoint. This composition gives the object an original character that can gracefully fit into the domestic environment. Made out of traditional materials and inspired by a traditional form of art, the pieces nonetheless, affirm a contemporary expression, evoking a 'mystic' feeling similar to that of music. The pieces combine both the lightness and strength typical of ballet dancers.
